1. Claims 1-7 and 9-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language at the end of the amendment to claim 1 is confusing because it refers to pores between particles that are not claimed. The examiner suggests that the claim language would be clearer if the phrase was deleted beginning with "instead."
2. Claims 1-7 and 9-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment to lines 4-6 of claim 1 is new matter because there is nothing in the specification to suggest an intent to exclude ink receiving layers that are not foamed. This concept is not supported by examples that positively recites foamed layers because it amounts to an exclusion or a negative limitation.
3. Applicant's arguments with respect to claims 1-7 and 9-13 have been considered but are moot in view of the new ground(s) of rejection. It is noted that if the new matter is removed from the claim without other amendments that avoid the prior art, rejections over DeBoer (6,229,302) and Baker (EP 1,060,901) will be made.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pamela Schwartz whose telephone number is (571) 272-1528.
